PricewaterhouseCoopers LLP Advisory
Forensic Technology Solutions
Associate Intern
Summer 2012

Are you interested in the opportunity to work for an industry-leading company that services Fortune 500 companies, and will give you the experience and exposure you need to build your career? If you are, then PricewaterhouseCoopers LLP (www.pwc.com/us) is the firm for you. Pricewaterhousecoopers LLP (PwC US) is well placed to help clients meet the challenges and opportunities of the US marketplace in the areas of assurance, tax, and advisory. We offer the perspective of being part of a global network of firms combined with detailed knowledge of local, state and US national issues. More than 163,000 people in 151 countries across our network share knowledge, experience and solutions to develop fresh perspectives and deliver practical advice. Currently, we are the world’s largest professional service firm by revenue.

At PwC US, you will be part of a learning culture, where teamwork and collaboration are encouraged, excellence is rewarded, and diversity is respected and valued. We offer a flexible career progression model that allows for a variety of challenging opportunities throughout your career. We provide unparalleled coaching, mentoring, and career development programs; global opportunities; and state of the art technology-driven methodologies to help you provide quality service to our clients.

Our Advisory Practice

At PwC, you will find Advisory professionals with unparalleled financial and accounting expertise, knowledge of business processes, industry insight and technology, and customer relationship skills. Our Advisory professionals help companies anticipate, create and manage change. In short, we help companies to: (1) respond to crises, (2) improve business processes, and (3) transform their business. Note that across all of these solutions, we embed sustainability into our approach. This also includes helping clients to sustain prior changes that may have been undertaken to address a crisis.

Members of our Advisory practice provide a valuable service to our clients and strive to differentiate PwC by executing the following:

- We put our clients first: Each client situation is unique, and we tailor our approach to every relationship and engagement;

- We view the world from a client’s perspective: From the initial client meeting onward, we listen first, and then assemble a hand-picked team from across the firm;

- We create lasting value for our clients: We bring together the precision, structure, and deep analytical capabilities of audit and tax and the creative mindset and problem-solving skills of consulting; and

- We focus on action, impact, and value: We don’t just assess and recommend; we also help our clients implement with agility and flexibility.
Forensic Technology Solutions

Within Forensic Services, the Forensic Technology practice gathers, interprets, and analyzes massive volumes of data and applies financial, statistical, accounting, and computer forensics skills to provide cost-effective, proactive strategies and solutions to complex business disputes. In addition, we provide quantitative analytic solutions in instances where facts are at issue and answers are buried in voluminous, complex collections of transactional data. We perform these services for our clients by managing and analyzing the relevant data, enhancing our clients' ability to make better informed decisions.

Forensic Technology provides its consultants with the opportunity to work on a variety of projects across all major industries. We currently offer the following services to our legal and corporate clients in each of our offices:

- Accounting Data Analysis
- Financial Trading Data Analysis
- Data Assurance
- Healthcare Claims Analysis
- Fraud Detection -- Discovery Services / Computer Forensics
- Discovery Readiness
- Litigation Support Analysis
- Cybercrime Prevention & Response
- Electronic Document Retention Consulting
- Information Technology Expert Services

On a daily basis, you will work closely with Partners and other senior members of the team and will be constantly challenged to demonstrate creative thinking and individual initiative.
